- **Admissions to Ark Encounter** - While we do not see any extended rain in the forecast, at least for forty days and forty nights, we do know of a fellow named “Noah” who was spared from a flood by loading his family and many of the world’s animals into an Ark that he built from instructions he had been given. The Ark is a massive wooden structure . . . with the indication that the cost of building this vessel was considerably more than Noah spent, \$92 million. It is being built as described in the Book of Genesis using the original dimensions.
